Cafluttino, honoring coffee

Porcelain melds with glass to produce **Cafluttino**, the new goblet-cup from Ancap to distinguish the experience of **tasting coffee, liqueur-laced coffee** and special blends. Its shape and function make it one of its kind on the market: an original, new and exclusive implementation that exalts the quality of the professional coffee set. What is more, the elegant shape was devised to enhance the aroma of the coffee, create the perfect cream and keep the coffee hot; features that all professional cups from Ancap normally offer....but in a new and "TRENDY" way.
